

This architectural rendering shows the exterior facade of the 'New York' building, a modern structure with a stepped profile and a mix of white and dark grey panels. Below the facade, a series of floor plans are displayed, illustrating the building's layout and internal spaces. The plans include a large central hall, several smaller rooms, and a staircase. The overall design is clean and functional, reflecting a modern architectural style.

This block contains architectural drawings for the 'New House' project. On the left, there are two detailed floor plans showing the layout of the house, including rooms like the living room, kitchen, and bedrooms. To the right of the floor plans are two vertical sections showing the internal structure and roof profile. Further right is a perspective drawing of the house, showing its modern design with large windows and a flat roof, situated in a landscaped environment with trees and a paved area.

The architectural drawings for 'The Commons' development are presented in a multi-part layout. On the left, there are several detailed floor plans for different levels of the building, showing room layouts, corridors, and service areas. These plans are accompanied by a list of room names and their corresponding areas in square feet. In the center, there is a site plan showing the building's footprint, surrounding streets, and landscaping. To the right, a 3D perspective rendering shows the building's exterior, featuring a mix of brick and light-colored panels, and its integration into the surrounding urban environment with other buildings and green spaces.
